Because it takes time to diagnose the underlying cause of psychosis, On-Track will provide two types of service:

1. **Initial assessment & treatment (typically within 3 months):** Through that assessment phase, On-Track will determine which clients will benefit from rehabilitation in our program and treatment, and which clients should be referred to other more appropriate services. Individuals who do not have a psychotic disorder will not be admitted to the program.
2. **Intensive treatment and rehabilitation services:** This will be provided to those individuals who meet our inclusion/eligibility criteria listed above.

***** PLEASE NOTE: *****

1. An incomplete referral form will not be processed.
2. Please ensure all supporting documentation is included with the referral.
3. We do not offer a prodromal clinic service.
4. We do not provide crisis management support during the referral process or wait list period.
