

Home Video Visit Patient Checklist

To make the most of your appointment with your diabetes specialist (endocrinologist), please:

1 to 2 weeks before your appointment:

- Have your blood work done at a community lab near you or at The Ottawa Hospital.

1-2 days before your appointment:

- Have your blood pressure taken either using a personal blood pressure monitor or at a community pharmacy.
- Check and record your weight.
- Provide us with 2 to 4 weeks of blood sugars prior to your appointment. Email your blood sugars to _____ or fax 613-738-8261.

You can send in your blood sugars by doing one of the following:

- Download your meter and send your results as above.
- Write down your results in a log book and email or fax them in with a scan or a picture.
- If you are using an insulin pump, please upload your pump.
 - If you are using Carelink: you will need to provide us with your username and password to view your results. Please email to the email above.
 - If you are using Diasend: the clinic number to share your data is 17-86053 for Animas and 87-90685 for OmniPod.
- If you are using a continuous or flash glucose monitor, please link your device to your pump upload (if possible) or send us your last week of data.
- Email us the fax number for your pharmacy and a current list of your medications. Let us know if you need prescription refills.
- Have your questions ready!

To make the most of your appointment with your diabetes educators (nurse and/or dietitian), please:

1-2 days before the appointment:

- Provide us with 2 to 4 weeks of blood sugars prior to your appointment. Email your blood sugars to _____ or fax 613-738-8261.

You can send in your blood sugars by doing one of the following:

- Download your meter and send your results as above.
 - Write down your results in a log book and email or fax them in with a scan or a picture.
 - If you are using an insulin pump, please upload your pump.
 - If you are using Carelink: you will need to provide us with your username and password to view your results.
 - If you are using Diasend: the clinic number to share your data is 17-86053 for Animas and 87-90685 for OmniPod.
 - If you are using a continuous or flash glucose monitor, please link your device to your pump upload (if possible) or send us your last week of data.
-
- If you want to review your carbohydrate ratio, keeping 2-3 days of food logs is useful prior to the appointment (but not mandatory).
 - Have your questions ready!
